HYALURE HA FACE LINE, WHERE SCIENCE MEETS SAFETY, PERFORMANCE AND ELEGANCE

Hyalure HA Face Line represents the next generation of dermal fillers, combining a unique crosslinking technology with high purity raw materials to achieve long lasting and natural-looking results in total safety. Our line is a perfect mix of 4 monophasic, crosslinked hyaluronic acid dermal fillers, each tailored for the treatment of facial volume loss and asymmetries in different anatomical areas.

All Hyalure dermal fillers are crosslinked with the Hybrid Bio Link technology, a special and unique procedure obtained with a planetary mixer. The orbital movement of the device allows to achieve:

TECHNOLOGICAL ADVANTAGE	RESULT	CLINICAL PRACTICE ADVANTAGE	PATIENTS' BENEFIT
unique viscoelastic and cohesive hydrogels	Balance	more resistance to mechanical stress	Longer lasting aesthetical correction
unique homogeneity of the hydrogels	Harmony	high tissue bio-integration	Natural result
a squeeze out of the air from the hydrogels	Coherence	bubble free formulation, no bubbles are found in the syringe	Improved safety
the addition of lidocaine at the beginning of the crosslinking reaction for a homogeneous spreading all over the hydrogel	Consistency	Better pain management for comfortable injections	Almost pain free procedures
one of the lowest certified BDDE residual in the hydrogel: less than 0,1 ppm	Reliability	No sensitization to BDDE and extremely low chances to experience late onset	Extremely low risks of side effects
an easy flow of the hydrogel out of the syringe	Smoothness	Low extrusion force for an easy injection	More comfortable procedure

HYALURE

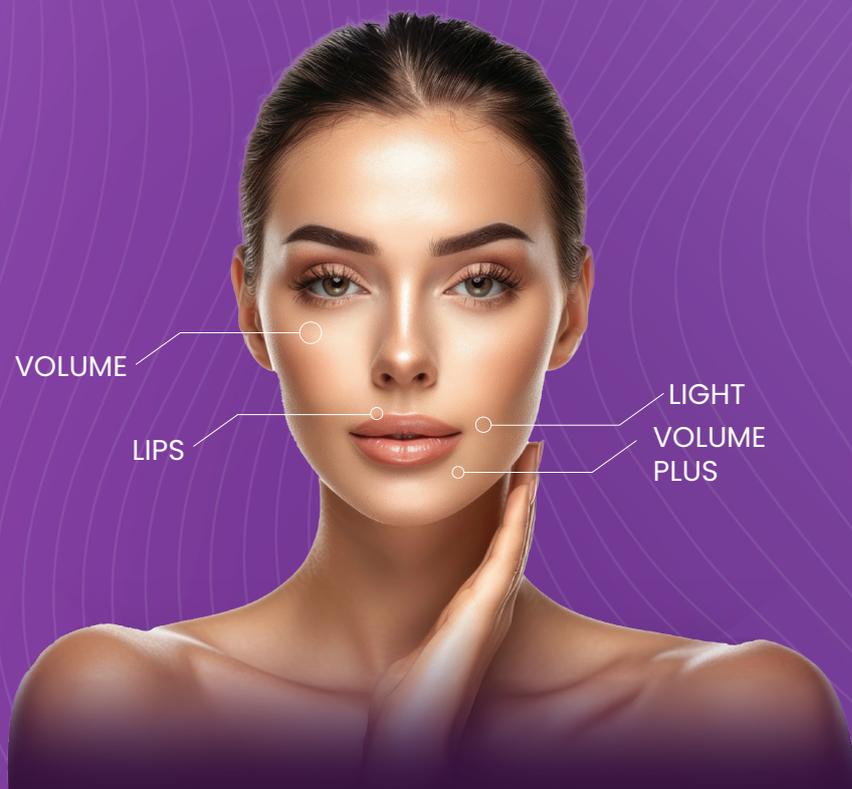

WHY CHOOSE HYALURE HA FACE LINE?

-  OUTSTANDING CONTROL AND SMOOTH INJECTIONS
-  NATURAL, LONG-LASTING RESULTS
-  MINIMAL, DOWN TO ZERO RISK OF LATE ONSET
-  LIDOCAINE FOR COMFORTABLE AND PAIN FREE INJECTIONS
-  SCIENTIFICALLY ENGINEERED FOR PRECISION AND SAFETY

THE FOUR HYALURE REFERENCES

PRODUCT	INDICATION	INJECTION LAYER
LIGHT	FINE LINES, SUPERFICIAL CORRECTION	SUPERFICIAL/DEEP DERMIS
LIPS	LIP CONTOURING AND VOLUMIZATION	MUCOSA / VERMILLION BORDER
VOLUME	MID-FACE, PERIORAL	DEEP DERMIS / SUBCUTANEOUS / SUPERFICIAL FAT COMPARTMENT
VOLUME PLUS	MID AND LOWER FACE	DEEP FAT COMPARTMENTS / PRE-PERIOSTEAL (SUPRAPERIOSTEAL)

INJECTION PLAN

Hyalure Light

18 mg/ml HA crosslinked

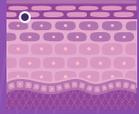

0,3 mg/ml

2 x 1ml

30G ultra thin

About 6-8 months

Intradermal and/or subcutis

Hyalure Lips

20 mg/ml HA crosslinked

0,3 mg/ml

2 x 1ml

30G ultra thin

About 6-8 months

Vermillion and/or perioral area

Hyalure Volume

22 mg/ml HA crosslinked

0,3 mg/ml

2 x 1ml

27G extra thin

About 9 months

Subdermal

Hyalure Volume Plus

22 mg/ml HA crosslinked

0,3 mg/ml

2 x 1ml

25G thin

About 9 months

Subdermal and/or supraperiosteum

HYALURE

ITALIAN CRAFTSMANSHIP

HYALURE™ is a globally recognized innovator in medical aesthetics, specializing in advanced dermal fillers that blend science, technology, and Italian craftsmanship. Established in 2022, the company is committed to delivering safe, effective, and long-lasting aesthetic solutions for medical professionals. With its headquarters in Malta, and a state-of-the-art production facility in Italy, HYALURE™ operates under strict regulatory oversight to ensure the highest standards of quality, consistency, and performance. Each filler is meticulously engineered for optimal safety, precision, and natural results, setting new benchmarks in the industry. Through continuous research and innovation, HYALURE™ remains at the forefront of aesthetic advancements, providing cutting-edge solutions that enhance both patient outcomes and aesthetician's confidence.
