

EXOLURE

EXOSOMES TECHNOLOGY

Exosomes refer to tiny particles, typically ranging from 30 to 100 nm in size, that are released and received by nearly all cells within the body. Exosomes possess the ability to selectively target specific cells. Once they reach their intended destination, they can transfer their cargo, which includes mRNA, miRNA, and growth factors, to the recipient cells. Alternatively, exosomes can activate signaling pathways to induce changes in the behavior of the recipient cell.

In simple terms, exosomes are the body's way of sending essential instructions between cells.

ITALIAN EXCELLENCE

We take immense pride in our Italian heritage. Our products are meticulously crafted in Italy, adhering to the highest standards set by Italian Authorities. Our raw materials are sourced from the finest Italian quality HA, ensuring top-notch ingredients for our products.

INNOVATION

EXOLURE is an innovative facial care product that harnesses the potency of cutting-edge ingredients to revitalize your skin. By blending hyaluronic acid, growth factors, peptides, placenta, cmc all enhanced plant-derived exosomes from embryonic mesenchymal cells.

EXOLURE

INGREDIENTS

Hyaluronic Acid

When injected into the skin, it can attract and hold water molecules, resulting in improved hydration and plumpness of the treated area.

Instant Beauty

It immediately reduces the presence of wrinkles and expression lines, reducing the 3 signs of eye aging: swelling, dark circles and wrinkles. It has muscle relaxing properties.

BBP-Peptide

New patented synthetic tripeptide that reduces and controls skin greasiness with immediate and long-lasting results, reducing visible pores.

Boto Peptide

Boto Peptide is the world's first botulinum toxin type C peptide. Boto peptide brings efficient, fast and safe results also with topical applications without injection.

Placenta

Youth activator capable of reactivating cellular dynamism, strengthens the skin barrier and acts on evident wrinkles to smooth.

CarboxyMethylCellulose (CMC)

CMC possesses properties that can have a soothing and brightening effect on the skin, potentially helping to alleviate irritation, redness, and inflammation.

EXOLURE VISAGE

Composition: Hyaluronic Acid, CMC, Placenta, BBP-Peptide, Instant Beauty, Boto Peptide

Packaging: 6x6 ml

Shelf life: 2 Years

Storage: 5°C to 25°C
